

Fotex Drain Clear is the ORIGINAL drain cleaner specifically formulated for Film Processor Drains!

is especially compounded to react with and dissolve, chemical and iron

deposits commonly found in PHOTOGRAPHIC & MEDICAL IMAGING PROCESSOR DRAINS. Fotex is especially effective on metallic replacement silver recovery compliance systems.

initial mechanical cleaning or daily treatments of Fotex. Fotex Drain Clear is an extremely efficient preventative maintenance product. Regular and consistent use on a weekly to monthly basis will discourage the chemical deposits from accumulating within the drain system. This process can be easily done during monthly processor maintenance procedures.

Ordinary drain cleaners are designed to dissolve foreign matter accumulated in drain traps. This foreign matter must be organic in nature in order for most commercial drain cleaners to be effective. Ordinary drain cleaners, therefore, will not effectively remove chemical and iron deposits. Chemical and iron residue deposits found in processor drains gradually build up along the entire inside surface area of the drain pipe. Inevitably, these deposits will completely restrict the flow of effluent, causing drain back-up, resulting in flood conditions. When the drains reach this restricted condition, they must often be replaced or mechanically cleaned.

Fotex Drain Clear will dissolve these deposits, however, severely restricted drains may require

When initially using Fotex Drain Clear, it is beneficial to use multiple treatments more frequently, to help remove previously deposited material from the drain system.

Fotex Drain Clear is an easy, clean and inexpensive method of reducing your maintenance costs, protecting your equipment and insuring the safety of your personnel.

Fotex is available in boxes of 12 packets - Catalog #FTX-12 OR cases of 3 boxes for a total of 36 packets - Catalog #FTX-36

An actual cutaway section of a 4" hospital medical imaging film processor drain pipe that did not use Fotex Treatments.

It shows chemical and iron deposits which form, blocking your drain, requiring their complete replacement.

The Fotex "Single Shot" pre-measured plastic packets are easy to use, take the guess work out of dosage, and chemical freshness is retained until opened. Just snip off the corner of a Fotex packet, pour & you'll gain these advantages:

- ▲ Fotex dissolves and removes chemical and iron deposits that organic cleaners can't budge
- ▲ Fotex prevents drain repair and replacement
- ▲ Fotex prevents costly processor downtime
- ▲ Fotex prevents flooding and shock hazards
- ▲ Fotex can help eliminate OSHA violations due to recurring hazardous conditions
